£4350pcm (paid quarterly or £5450 monthly)

STANDARD FEATURES
Infacom Assured

Infacom professionals have a broad experience base that enables them to deliver a very high standard of remote collaboration support and training. They will upskill your teams to follow the best practice methodologies and help your team adapt their behaviour and adopt new practices for better collaboration.

Our team are trainers, change experts, tech-enabled, IT support solutions specialists, experienced meeting facilitators with the systems, experience and solutions to assure you can do what you need to do remotely, do it brilliantly, and conduct business more efficiently and productively.

Each of our packages provides access to the standard features, which includes:

☑ Nureva™ Span™ Infacom Assured Deployment
We provide you with up to ten creator licenses and rapid training for your team leaders to drive collaboration. The assured package includes unlimited contributor and viewer licenses for your teams to work with as many others as you need, internal or external to the organisation. The set up of collaboration platform and all associated work is all done for you.

☑ Collaboration Training & Troubleshooting
We survey all users to establish level of readiness (tech, experience, competency) to begin on-line meetings then run collaboration training to allow users to drop in and test, trial and learn how to work with the new remote systems. We troubleshoot to resolve all issues promptly.

☑ Continual Improvement Consultations
We keep your team at the top of their game by consulting to understand successes and blockages. We regularly develop the remote user guide and assess performance against the targets then determine the improvements required.

PACKAGE DETAIL
Assured for Enterprise

Assured for enterprise is delivered by the Infacom corporate team. Our specialist trainers and experts regularly handle involved "many to many" collaboration challenges and our audiovisual team will ensure you have the correct hardware for professional collaboration. The facilitation we provide gives your teams the right technology and methodology for the work they need to do remotely.

This package will continually improve the remote effectiveness of organisations and leaders to find how to achieve efficiency and autonomy to deliver collaboration capbility at scale.

⊞ Enterprise-level assured deployment in partnership with your IT department and following company guidelines.

⊞ Company-wide universal login systems will be implemented for all users with your existing platforms if required.

⊞ Twice monthly collaboration clinics for company-wide drop-ins and problem-solving at scale for group learning and fast progression.

⊞ Unlimited remote leadership training for advanced collaborative working to inform, interact and inspire at the highest level.

⊞ Best practice webinars for rapid training and improvment at scale for CPD.

⊞ We will facilitate the development of working methods and process transfer within new remote platforms with a Focus on data sharing capabilies and efficiency.

⊞ Dry Run / Trial Runs / Session Preparation for client-facing and outbound meetings - test all set up with all users before meetings to ensure all can run smoothly.

⊞ Guide and assist in the creation of your standard operating procedure manuals and progression to best practice methodologies for hardware, software and systems then asess actual progress vs expected in program uptake.
